

# THAYS RIBEIRO MAHER

Phone: +1 (714) 719-8170 | Email: [thaysmoiaribeiro@gmail.com](mailto:thaysmoiaribeiro@gmail.com) | Santa Ana, CA - 92704

LinkedIn: <https://www.linkedin.com/in/thays-ribeiro-maher-475b39275/> | Github: <https://github.com/ThayRibeiro0> | Portfolio: <https://thaysribeiomaher.netlify.app/>

Software Engineer with experience in full-stack web development, passionate about building scalable and high-performance applications. Strong foundation in JavaScript (ES6+), TypeScript, Node.js, and React.js, with knowledge in microservices architecture, relational and non-relational databases, and experience with CI/CD and Docker. Skilled in working with agile teams, contributing to the development of distributed and highly available systems.

## TECHNICAL SKILLS

React.js, Python, PHP, Java, C, Scratch, JavaScript (ES6+), TypeScript, HTML5, CSS, Advanced CSS, SCSS, Tailwind, Bootstrap, Node.js, Express.js, HandleBars.js, Server and API, Web API, MySQL, SQLite, SQL, MongoDB, Prisma, Git/GitHub, Visual Studio Code, Codespace, Docker, CLI, Vite.js, Best Practices, Agile, Scrum, Code Reviews, Git Copilot, Android Studio, Three.js, Web Systems Project, Prompt Engineering.

## PROJECTS

**Stargazers** | <https://github.com/ThayRibeiro0/stargazers> | <https://thayribeiro0.github.io/stargazers/#>

- Summary: Developed a React application that interacts with the GitHub API to display user and repository data.
- Role: Sole Author
- Tools: Utilized SCSS for responsive styling and Vite.js for optimized performance.

**Pokedex** | [https://github.com/ThayRibeiro0/pokemon\\_app](https://github.com/ThayRibeiro0/pokemon_app) | [https://thayribeiro0.github.io/pokemon\\_app/](https://thayribeiro0.github.io/pokemon_app/)

- Summary: Built a dynamic web application using JavaScript and Bootstrap, integrating an external API to fetch Pokémon data.
- Role: Designed a user-friendly UI with modal-based details and local storage for saving favorites.

**Calculator** | <https://github.com/ThayRibeiro0/calculator> | <https://thayribeiro0.github.io/calculator/>

- Summary: Created a JavaScript-based calculator with real-time operations and state management.
- Tools: Ensured cross-browser compatibility and optimized rendering with event-driven updates.

## EXPERIENCE

### Volunteer Frontend Developer (July 2023 – January 2024)

CareerVillage.org | Remote

- Contributed to enhancing the platform's user experience and performance.
- Implemented UI improvements, increasing engagement and usability.
- Collaborated with developers to optimize frontend components and integrate API endpoints.

### Facilitator Operator | (August 2024 – Present)

*Life Time Fitness Inc. | Santa Ana, CA*

- Developed troubleshooting and problem-solving skills relevant to debugging and system optimization.
- Worked in a fast-paced environment, multitasking and optimizing workflow efficiency.

## **EDUCATION**

### **Full Stack Web Development Bootcamp**

University of California - UC Irvine - California, United States of America

### **Associate in Software Engineering/System Development**

ETEC - Itaquera State Technical School - Sao Paulo, Brazil

### **Associate in Administration**

ETEC - Francisco Morato State Technical School - Sao Paulo, Brazil

### **Bachelor in Law**

University Nove de Julho - UNINOVE - Sao Paulo, Brazil

## **CERTIFICATIONS**

- **CS50's Introduction to Computer Science** - Harvard
- **React.js Essential Training** – LinkedIn Learning
- **AWS for Developers** – LinkedIn Learning
- **Docker** - LinkedIn Learning
- **Information Technology** - IFRS Brazil
- **Learn React** - CodeAcademy

## **LANGUAGES**

**English:** Bilingual Proficiency | **Portuguese:** Native
